In this month’s Bulletin

In editorials this month, Stephen Martin and colleagues (714) explain why stockpiles of oral cholera vaccine are needed and Godelieve van Heteren and colleagues (715) point to areas of debate in health systems research. Ben Jones & Mireia Bes (718–719) report on efforts to increase organ donations.

Mexico
Lessons from pandemics
Luis Meave Gutiérrez-Mendoza et al. (782–787) describe how oseltamivir was stored and distributed in 2009.

Saving money on drugs
Octavio Gómez-Dantés et al. (788–792) explain how better negotiation reduced the costs of procuring medicines.

El Salvador
Influenza-related hospitalizations
Wilfrido Clara et al. (756–763) report rates of severe pneumonia in children.

South Africa
Reproductive health impacts
Gita Ramjee & Handan Wand (748–755) measure how much hormonal contraceptives effect HIV transmission and pregnancy.

Viet Nam
Documenting a demographic transition
Nguyen Phuong Hoa et al. (764–772) use surveillance to estimate mortality rates.

India
Tracking deadly diarrhoea
Shaun K Morris et al. (720–727) estimate deaths due to rotavirus.

Kenya
Complications of male circumcision
Amy Herman-Roloff et al. (773–781) examine the safety of voluntary male circumcision programmes.

Mexico
Lessons from pandemics
Luis Meave Gutiérrez-Mendoza et al. (782–787) describe how oseltamivir was stored and distributed in 2009.

Saving money on drugs
Octavio Gómez-Dantés et al. (788–792) explain how better negotiation reduced the costs of procuring medicines.
